OVERVIEW

ReadySet Surgical provides cloud-based, vendor-managed inventory solutions for health systems, hospitals, and surgery centers. ReadySet Solutions offer advanced scheduling, proactive alerts, charge sheet reconciliation, real-time status notifications, equipment tracking and actionable reporting to streamline surgical implant supply chains. Supply chain, OR, and SPD personnel all benefit.

SOLUTIONS

ReadySet TRACK

Vendor-inventory documentation and tracking for loaner and consignment management

ReadySet COORDINATE

Advanced vendor notification and case coordination [includes ReadySet Track]

ReadySet CAPTURE

Streamlined and accurate "bill-only" charge capture

ReadySet ANALYZE

Actionable reports designed to help manage and improve supply chain processes

WHY READYSET

Save time and money, improve staff satisfaction, and enhance care efficiency and coordination by:

- Automated advanced scheduling – ReadySet’s use of machine learning for algorithmic scheduling is unmatched. Streamline hospital staff communication and decrease the amount of time managing vendors.
- Actionable analytics - Access granular, on-demand reports for vendor performance and track supply costs by facility, department and surgeon. Leverage insights to capture lost revenue, reduce supply costs, and improve vendor and staff performance.
- Proactive identification of non-compliant inventory requests – Stay in front of non-compliant requests with proactive alerts from ReadySet.
- Elimination of non-compliant purchasing - Reduce costs and headaches by quickly eliminating non-compliant purchases.
- Automation of "bill-only" validation against Item Master prior to submission - Eliminate countless hours of staff time required to reconcile charge sheets, allowing your facility to generate revenue sooner.
- Hard-dollar ROI – Experience real hard-dollar savings quickly after implementation.
